AIRPRESS | compressoren

PISTON SOMPRESSORS
BLACK PRO SERIES

BLACK PRO SERIES

Black Pro Series is the newest line of professional workshop compressors by Airpress. Powerful and efficient belt-driven piston compressors are available in different versions with maximum diversified technical parameters, so you can easily choose the model suitable for your needs.

All models mounted on tanks from 50 to 270 liters are fully mobile compressors, equipped with heavy-duty transport wheels and comfortable handle. Vertical compressors and models mounted on tanks over 270 liters are stationary workshop compressors with higher performance.

* Equipped with high-quality, durable and overload-resistant electric motors - from 2 HP to 10 HP.

* Offered in versions with a maximum pressure of 10 or 11 bar.

* Fully manufactured in the EU, in accordance with European quality standards and safety norms.

* Copper fittings with high temperature resistance improve cooling processes.

* All models of the Black Pro Series are equipped with high-efficiency two-piston pumps with reduced RPM. The two-stage models have an efficient intercooler to keep the pump at optimum operating temperature and to reduce the temperature of the compressed air.

* Belt system cover made of reinforced plastic with profiled cooling channel improves the flow of air cooling the piston pump.

* Solid and durable air tanks tested in high pressure conditions - a guarantee of full work safety.

STAY EFFICIENT - CHOOSE ONE OF THE BLACK PRO SERIES COMPRESSORS!
